Erasmus sub-programme - Multilateral Projects Action**

## Context

The international circulation of economic ideas is a core phenomenon to understand the evolution of the history of economic thought and the present state of economics. One of the main ways for diffusion of economic ideas has been translation of economic texts.

## Objectives

The EE-T project, funded by the European Commission, in the framework of the Lifelong Learning Programme – Erasmus sub-programme, has the objective to assess the impact of translations of economic texts on the History of Economic Thought in Europe.

## Target Group

The project is addressed to:

- Researchers specialized in History of Economic Thought (HET)
- Researchers specialized in Languages for Specific Purposes (LSP) studies.
- Educators in History of Economic Thought, linguistics and experts in pedagogy.
- Graduate students

## Main Activities

The project organized in the following main activities:

### Creation of a Database of Translations of Economics Texts

Development of a database of translations of economics texts of the 18th, 19th and 20th centuries in order to make available a systematic and classified collection of economic translations.

### Research Activity

Carrying out of a research on translations of economics texts in the 18th, 19th and 20th centuries. The aim of the research is to produce interpretations of the phenomenon of economic translations in the framework of the processes of transnational circulation of economic ideas.

### Development of Educational Tools

Creation of tools to aid in the teaching of the history of economic thought, stressing the phenomena related to diffusion of economic ideas through translations: Reading guides, exercises, questionnaires and online lectures

## Results

- Database of translations of economic texts and link to their digital editions
- Online collection of digital versions of translations of economic texts
- Research papers on the historical, social, theoretical and linguistic aspects of translations of economics
- Educational tools to foster the study of the impact of translations of economic texts on the HET in Europe: Reading guides, exercises, questionnaires and online lectures
